Welcome to My CV!

Hello my name is Emirhan. I am Computer Engineering student. My software development journey began with C#. Then I switched to the web development field. Currently, I am developing myself as a Frontend Developer in the web development field.

Education

BS Igdır University, Computer Engineering – Igdır, Turkiye Oct 2022 – present

Experience

Summer Intern, Valde Information Technologies – Istanbul, Turkiye July 2025 – Sept 2025

- I developed a web-based product/request management system where users can request products and administrators can approve or reject these requests. In this project, I built a modern frontend using React and Next.js, secured the state and data structure with Redux Toolkit and TypeScript, and improved the user interface with MUI and custom components.

Projects

NextJS Store Project

A web application for adding product system

Personal Portfolio Website

A personal website where my projects are located and where I can be contacted

CoreWeb Group Projects

Coreweb is a comprehensive platform where users can order professional logos and websites, while administrators can manage these orders.

Skills

Programming: HTML, CSS, JS React, NextJS Typescript, Redux Toolkit

Languages: English (B1), Turkish (native)
